Volume 32 1993

Sommaire

Volume 32 1993

EXTENDING THE LIFE OF WELDED STRUCTURES

Foreword iii
R.W. Nichols

PORTEVIN LECTURE

The significance to industry of achieving long life in structures 1
Sir Robert Easton (United Kingdom)

SESSION 1
DESIGN AND CHOICE OF MATERIALS FOR LONG LIFE

Design of welded structures to avoid fracture and plastic collapse 25
A.M. Clayton (United Kingdom)

Fatigue assessment of welded structures 33
S.J. Maddox (United Kingdom)

Corrosion, erosion and protection of welded structures 43
O. Knotek and A. Schrey (Germany)

Life assessment and extension of welded structures for high temperature components 51
F. Masuyama (Japan)

SESSION 2
INDUSTRIAL EXAMPLES

The plan to renew EDF's traditional power stations — presentation of guidelines 67
P. Chardonnal and G. Thoraval (France)

Stress analysis and fatigue life prediction of ship structures 75
H. Petershagen (Germany)

Non-ferrous and non-metallic aspects of ship construction or 83
The place of composite materials in marine structures
J. Gerald (France)

Aluminium alloys in arc welded constructions 97
D. Albert (France)

PROLONGATION DE LA DUREE DE VIE DES STRUCTURES SOUDEES

CONFERENCE PORTEVIN

De l'importance, pour l'industrie, de produire des structures durables 11
Sir Robert Easton (Royaume-Uni)

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Tout en veillant par tous les moyens à ce qu'aucune indication, information ou assertion erronnée n'apparaisse dans cette revue, les éditeurs et la rédaction tiennent à préciser que les données et les opinions figurant dans les articles et les publicités sont sous la responsabilité des auteurs d'articles ou de publicités concernés. En conséquence, les éditeurs, les rédacteurs en chef, le Comité de rédaction et leurs employés respectifs dégagent toute responsabilité vis-à-vis des conséquences d'indications, opinions ou assertions incorrectes ou erronnées.

Contents continued from previous page

Life assessment and extension for bridge and building structures 115
F.M. Burdekin (United Kingdom)

Life assessment of welded joints in high pressure compressor rotors of turbojet 123
J.Y. Loreau, J.P. Ferté and P. Kapala (France)

Plastic pipes and their weldments 125
B. Calinaud (France)

SESSION 3
PRE-SERVICE AND IN-SERVICE INSPECTION ASPECTS

The role of QA and QC in the life extension of structures 139
A.F. Gifford and S.E. Good (United Kingdom)

Examples of recent developments in NDT techniques 149
P. Kreier, X. Edelmann and T. Lüthi (Switzerland)

The effectiveness and reliability of in service inspection 161
S. Crutzen (Italy) and R.W. Nichols (United Kingdom)

The ASME Section XI approach for ferritic steel pressure vessels 171
O.F. Hedden (USA)

SESSION 4
OPERATIONAL MONITORING AND SURVEILLANCE

Benefits in life extension by advanced condition monitoring 181
K. Torronen (Finland)

Leak detection and acoustic emission 183

Non destructive methods for surveillance of changes in material properties and material damage 185
F.A. Wedgwood (United Kingdom)

SESSION 5
THE ASSESSMENT OF ANY FLAWS FOUND IN SERVICE

A review of methods for fitness for purpose evaluation of defected parts in the field of extended plasticity 197
D. François (France)

Structural integrity significance of in-service inspection results 207
S. Reale and L. Tognarelli (Italy)

The philosophy of when to repair 215
P.S. Godfrey (United Kingdom)

Contents continued overleaf

Contents continued from previous page

SESSION 6
REPAIR AND MAINTENANCE

Avoiding of PWHT in repair welding of heavy walled pressure vessels 225
K. Kálna *et al.* (Slovakia)

Repair and maintenance — some examples from offshore and oil industry plant 237
R.H. Bond (United Kingdom)

Some examples from bridges and frame structures including repair welding under load 245
Le Zeng and Pei-De Ling (PR China)

The repair and maintenance of nuclear power plant 251
J.P. Gaudin (France)

Preventive maintenance of open-cut continuous mining equipment 267
D.K. Feder (Germany)
